

Project no.:
679692

Project acronym:
Eco-Solar

Project full title:
Eco-Solar Factory: 40%plus eco-efficiency gains in the photovoltaic value chain with minimised resource and energy consumption by closed loop systems

Research and Innovation Actions (RIA)

FOF-13-2015

Start date of project: 2015-10-01
Duration: 3 years

D 6.1
Public website
online (WP 6)
<http://ecosolar.eu.com>

Due delivery date: 2015-12-01
Actual delivery date: 2015-12-03

Organization name of lead contractor for this deliverable:
BCC

Project co-funded by the European Commission within the Framework Programme Horizon 2020 (2014-2020)		
Dissemination Level		
PU	Public	x

Abstract
<p>To create a platform through which the consortium can disseminate the public results of the Eco-Solar project, a website will be launched. The consortium will update this website on a regular basis, with publications and general descriptions of the work content carried out in the project. The scientific papers that are written, based on the achievements in the previous WPs will either be uploaded to or cited in this website (depending on copyright bounds).</p> <p>SINTEF, ISC Konstanz and AIMEN will provide regular updates on their research progress that can be disseminated through the website.</p>

Public introduction¹
This deliverable has a public dissemination level.

¹ All deliverables which are not public will contain an introduction that will be made public through the project WEBSITE

1 INTRODUCTION

The project website is one of the several communication sources within the Eco-Solar project. The main reason for the website is to create a platform through which the consortium can disseminate the public results of the project. The consortium will update this website on a regular basis, with publications and general descriptions of the work content carried out in the project. The scientific papers that are written, based on the achievements in the previous WPs will either be uploaded to or cited in this website (depending on copyright bounds).

SINTEF, ISC Konstanz and AIMEN will provide regular updates on their research progress that can be disseminated through the website.

The website is also one of the communication sources for the General Assembly within the project.

The website address is <http://ecosolar.eu.com>.

1.1 Dissemination and exploitation

The website is part of the dissemination and exploitation plan within the Eco-Solar project and is one of the measures to maximise the intended impact. The dissemination activities aim to promote non-confidential results obtained within the project as swiftly and effectively as possible to benefit the whole PV and recycling community and avoid duplication of R&D efforts.

The consortium will update this website on a regular basis, with publications and general descriptions of the work content carried out in the project. This includes public results from work packages, like important milestones and deliverables. In particular, SINTEF, ISC Konstanz and AIMEN will support with providing regular updates on research progress that can be disseminated through the website.

Information related to the market and value chain, relevant for the project or for recycling strategies in general, (and of course without breaching confidentiality issues within the consortium) will be announced on the website. We plan to use our value chain figure as the basic structure, to display the relevant information.

2 METHODOLOGY

The website has been built with WordPress template “Polytechnic” and will be further developed throughout the project duration, to communicate the project’s results

The website has the following tabs:

- News – relevant information regarding or involving the Eco-Solar project
- Results - SINTEF, ISC Konstanz and AIMEN and other partners within the project to provide regular updates on their research progress that can be disseminated through the website Results will be disseminated in a visual way, linked to our project milestones and the market outcomes.
- Resources – links and resources related to the project
- Project Summary – summary of the project, which will be updated with public information during the project.
- Partners & People – information page regarding the partners and people involved
- Contact – contact information for the Project Coordinator and a contact form for visitors to contact the project partners within the project

Some of these tabs have already been filled with information, others will be filled out during the next 3 months of the project so the website can be evaluated at the 6 months meeting. This might change the website setup or add new tabs, e.g. for the workshops that are planned, or to show results.

Moreover, after each consortium meeting, public results from the research, as discussed in the meetings will be announced on the website.

Website statistics:

Within 3 months after the “live date”, the website will start collecting statistics on how many visitors the site receives, which countries they visit from, which pages are looked at among other things. These statistics will be used as an indicator to update, maintain and improve our website for all visitors.
